

Primmavera is born during first pandemic year. It owes its name and its double M to the song Stop Bajon by Tullio De Piscopo, because it was ringing in my head the sentence that says "... when we go out it will be spring...". (double M also because aglianico has always something more..)

2024 vintage.....
Delicate fruit and rose petals to cover a deep soul, if it were music it would be Roberta Flack who interprets Compared to what (Roberta Flack, First Take, Atlantic 1969)
